DUS KOLECTORS

DK-5 Cyclone DusKolector

800 CFM

DK-6

1200 CFM (ILLUSTRATED)

The DK-5 and DK-6 cyclone models are the same with respect to floor space and dirt container capacity.

However the DK-6 has greater air capacity such as 36% more CFM and two bags as against one for the DK-5.

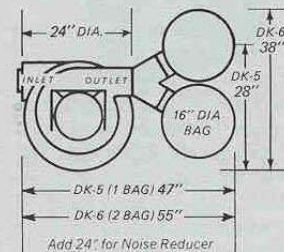

Extra Equipment:

Combination Bag and Dirt Container.

See pg. 22.

Noise Reducer. See below.

FLOOR PLAN Top View

The blower housing may be rotated so that the outlet may be in a different position relative to the inlet and also relative to the dirt container door.

DK NOISE REDUCER

The Noise Reducer can be supplied as extra equipment for all of the DK models.

It makes a noticeable reduction in the noise of the air flow.
